

NEW BIZOL PRODUCTS

diesel

PROFESSIONAL FLUID

BIZOL Pro Diesel System Clean+ p60

- reduces pollutant emissions
- suitable for vehicles equipped with DPF
- cleans the entire fuel system
- controls deposit formation

PROBLEM

- formation of deposits on injectors and intake valves
- deterioration of fuel flow through the engine causes
- irregular engine running
- power loss
- increasing emissions and high fuel consumption

SOLUTION

- protective film delays formation of new deposits
- improved fuel flow through the engine leads to
- smooth engine running
- better combustion
- fuel saving and therefore reduction of exhaust emissions caused by dirty injectors

diesel

ADDITIVE

BIZOL DPF Regeneration+ d61

- supports continuous DPF regeneration
- reduces soot built-up
- prevents malfunctions of the DPF
- extends DPF lifetime

PROBLEM

- loss of engine performance
- car does not reach its maximum speed
- increase of fuel consumption
- increased emission level

SOLUTION

- maximum speed and performance level of engine
- less fuel consumption
- minimum level of emissions
- extended lifetime of DPF

fix

TECHNICAL SPRAY

BIZOL Rust Shock+ f22

- displaces water and protects against corrosion
- „cold shock“ effect for fast and effective loosening of injectors, glow and spark plugs
- contains PTFE particles for good sliding properties

PROBLEM

- seized injectors, glow or spark plugs can not be removed
- risk of damaging other engine components

SOLUTION

- easier and faster disassembly of seized injectors, glow and spark plugs
- risk of damaging other engine parts is reduced considerably

clean

TECHNICAL SPRAYS

BIZOL Diesel Intake Clean+ c35

- quick and effective cleaning of EGR valve and turbocharger without dismantling
- improves engine performance, reduces fuel consumption
- lowers emissions

PROBLEM

- clogged EGR
- heavy carbon deposits on turbo
- fluctuating idle
- loss of engine performance

SOLUTION

- optimized starting behavior
- smoother engine operation
- more efficient fuel economy
- improved exhaust gas values

BIZOL Gasoline Intake Clean+ c36

- fast and effective cleaning without dismantling
- leaves no residues
- significantly smoother engine operation after cleaning
- improves engine performance, reduces fuel consumption and emissions

PROBLEM

- loss of engine performance
- engine does not run smoothly
- increased fuel consumption
- increased emission level

SOLUTION

- easy starting
- smoother and more efficient engine operation
- higher fuel economy
- improved exhaust gas values for a cleaner environment

BIZOL Gasket Remover+ c37

- easy and fast application on a wide range of materials
- high dissolving properties
- removes hardened gaskets and persistent deposits
- good adhesion to vertical surfaces

PROBLEM

- gaskets cannot be easily removed from engine and transmission parts
- risk of damaging engine or transmission components

SOLUTION

- effective and time-saving repairs without risk of damaging engine or transmission components

lubricate

TECHNICAL SPRAY

BIZOL Ceramic+ L55

- advanced boron nitride-based formulation
- optimal for modern electronic driving safety systems (ABS, ASR, and ESP)
- protects against electrolytic corrosion

PROBLEM

- sensitive vehicle components operating under extreme conditions such as high temperatures are subject to galling of metal parts and wear

SOLUTION

- secures trouble-free operation of sensitive vehicle components operating under high temperatures, such as brake parts, exhaust parts, spark plugs, screwed connections
